Successfully Utilising the New FIDIC Procurement Guide

This new guide was published in late 2011, and it covers the procurement of engineering and building works for projects of all sizes and complexities. It emphasises the importance of preliminary investigation and studies before a construction or other engineering project is undertaken, and the development of a realistic project strategy for its realisation. After giving essential guidance on the underlying concepts and philosophy of procurement, and the planning necessary to form a sound basis for the forthcoming project, the Guide explains how the project strategy should be developed, as this will govern all subsequent stages of the process. This session will focus particularly on:

• THE STANDARDS FOR TENDER PROCEDURES
• THE PROCUREMENT GUIDE FOR THE PURPOSE OF CONSULTANTS SELECTION
